

NATIONAL HOLY GHOST CHURCH OF CHRIST
OSHODI PARISH, LAGOS, NIGERIA

CHURCH MANAGEMENT & ATTENDANCE SYSTEM

COMPLETE INSTALLATION, SETUP & OPERATING MANUAL FOR NEW COMPUTERS
Offline Desktop Edition (Windows 10 / Windows 11 / Windows 8.1)

System Name:	NHGCC Oshodi Church Database & Sunday Entrance Attendance System
Package Version:	v2.0 (Offline Standalone Windows Desktop Edition)
Applicability:	Windows Laptops, Church Office PCs, USB Flash Drives
Target Audience:	Parish Secretariat, Ushers, Media Team, Pastoral Board
Preloaded Database:	170 Deduplicated Official Members (From Original Parish Registry PDF)
Official Facebook:	facebook.com/nhgccoshodii (National Holy Ghost Church of Christ, Oshodi)
Document Release:	September 2026

EXECUTIVE OVERVIEW

This official manual provides instructions for copying, installing, and running the NHGCC Oshodi Church Management System on brand-new or replacement computers. The application is 100% self-contained: it requires **no Python installation** and **zero internet connection** for daily Sunday attendance check-in, member management, and Excel reporting.

2. Installation Package Contents	5. Daily Operation & Startup	8. Automated Pastoral Care	11. Parish Support Contact
3. System Requirements	6. Sunday Entrance Desk	9. Database Safety & Backup	

1. System Overview & Core Capabilities

The ****NHGCC Oshodi Church Management System**** is a purpose-built desktop application designed to manage church membership records, streamline Sunday entrance attendance, automate pastoral care, and track consecutive absentees at the Oshodi Parish. It runs locally as a secure Windows service and automatically displays in your default web browser for maximum ease of use.

Key Architectural Features:

- 1. Zero Internet Required:** Entrance check-in, live member search, profile editing, and Excel exports run completely offline on your church PC without internet connection.
- 2. Standalone Windows Executable:** Bundled with all libraries, SQLite database engine, templates, and styling. No technical setup, prerequisites, or command prompts required.
- 3. Pure Deduplicated Member Directory:** Ingested 203 original entries from the parish PDF registry, merged 33 duplicate records with zero data loss, producing **170 clean, unique members**.
- 4. Entrance Check-In Speed:** Search-as-you-type entrance desk allows ushers to check in members in under 2 seconds with an instant audio confirmation chime.
- 5. Automated 7-Day Birthday Alerts:** Flags celebrants 7 days prior and prepares email digests for the pastoral team.
- 6. Absentee Retention Engine:** Automatically detects members missing 2 or 3 consecutive Sundays, providing residential addresses for physical follow-up and home visitation.

2. Installation Package Contents

When copying the application folder to a new PC or USB drive, ensure the following core files are present:

File / Folder Name	Purpose / Description	Required?
NHGCC_Church_Database.exe	The core standalone application. Contains Python runtime, Flask server, and engines.	MANDATORY
Install_NHGCC_App.bat	1-Click automated installer. Creates desktop & Start Menu shortcuts.	RECOMMENDED
Start_NHGCC_App.bat	Quick launcher script. Alternative way to start the app from the folder.	OPTIONAL
nhgcc_church.db	The master SQLite database containing all 170 members and configuration.	MANDATORY
logo.ico / logo.png	Official church logo icon used for desktop shortcuts and browser headers.	INCLUDED
NHGCC database .pdf	Original scanned church registry document for historical reference.	ARCHIVE

3. System Requirements for New Computers

Component	Minimum Requirement	Recommended
Operating System	Windows 10 / 11 / 8.1 (64-bit)	Windows 10 or 11 (Latest Update)
Processor (CPU)	Intel Celeron / Core 2 Duo 1.8GHz	Intel Core i3 / i5 or AMD Ryzen 3/5
Memory (RAM)	2 GB RAM	4 GB RAM or higher
Free Disk Space	500 MB free space	1 GB (for database growth & backups)
Web Browser	Microsoft Edge (Pre-installed)	Google Chrome / Microsoft Edge / Brave
Internet Access	NONE required for attendance/records	Only needed if sending Gmail SMTP alerts

4. Step-by-Step Setup on a New Computer

Setting up the application on a new laptop or desktop is fast, clean, and requires only 3 simple steps. Choose either **Method A (Automated Installer)**** or **Method B (Portable USB Mode)****.

Method A: The 1-Click Desktop Installer (Recommended for Church PC)

Step 1: Copy the Application Folder to the New Computer

Insert your USB flash drive into the new computer and copy the entire NHGCC OSHODI DATABASE folder to a permanent location, such as C:\NHGCC_Church_Database or into your Documents folder.

Step 2: Run the Installer Script

Open the copied folder and double-click the file named:

Install_NHGCC_App.bat

Step 3: What Happens Automatically:

- Copies all application binaries and clean database to %LOCALAPPDATA%\NHGCC_Church_Database.
- Creates a **“NHGCC Oshodi Church Database”** shortcut on your Windows Desktop with the official church logo.
- Adds an entry to the Windows Start Menu under Programs.
- Starts the local church server and launches your default web browser directly to <http://127.0.0.1:5000>.

FIRST-TIME RUN INSTRUCTION

Windows Defender SmartScreen Notice:

When running Install_NHGCC_App.bat or NHGCC_Church_Database.exe for the first time on a new computer, Windows Defender may display a blue popup saying: *“Windows protected your PC”*.

What to do: Click **“More info”**, then click the button labeled **“Run anyway”**. This is standard for custom church software that does not carry an expensive commercial Microsoft digital signature.

Method B: Portable Flash Drive Mode (Direct USB Execution)

You can carry the application on a USB flash drive and run it on any church laptop without installation:

1. Plug the USB flash drive into any Windows laptop.
2. Open the folder and double-click **NHGCC_Church_Database.exe** directly.
3. The system immediately initializes and opens your web browser.
4. All attendance data is safely recorded. When finished, simply close the browser and console window.

5. Daily Operation & How the App Runs

Starting the App on Sunday Morning:

1. Double-click the ****NHGCC Oshodi Church Database**** icon on your Windows Desktop.
2. A dark console window will appear displaying the official church banner.
3. Within 3 to 5 seconds, your web browser will automatically open to the Church Management Dashboard.
4. **IMPORTANT:** Keep the dark console window open (or minimized) while using the system. It runs the background server.

Closing Cleanly: Close the browser tab, then click **'X'** on the dark console window or press **Ctrl + C**.

6. Sunday Entrance Attendance Desk (Operator Guide)

The Attendance Desk is specially tailored for church ushers, greeters, and the protocol team stationed at the church entrance. It works seamlessly on laptops and tablets.

Step	Action	Operator Guidance & Instructions
1	Open Attendance Terminal	In the left navigation menu, click 'Entrance Check-in' (URL: /attendance/checkin). The system automatically selects today's Sunday service.
2	Search for Member	As a member approaches, click the search bar or press '/' on your keyboard. Start typing their first name, surname, or phone number. Matching members appear instantly.
3	Mark Present	Click the green 'Mark Present' button. The button instantly switches to a green checkmark badge, records the exact check-in time, updates the live headcount, and sounds an audio confirmation chime.
4	Registering Newcomers / First-Timers	If an attendee is visiting for the first time or not in the directory, click the blue '+ Quick Register Member' button. Fill their Name, Phone, and Address in the popup modal. Upon saving, the system automatically registers them and marks them present for today's service in a single action!
5	Export Service Register to Excel	At the end of service, click 'Export Excel' at the top of the screen. A styled, ready-to-print Microsoft Excel register (.xlsx) is instantly downloaded with members' names, codes, departments, and check-in times.
6	Review Past Service History	Click 'Attendance Records' (URL: /attendance/history) to view all historical Sunday headcounts, service trends, and export past Excel registers.

PRO-TIPS FOR SUNDAY USHERS & GREETERS

Ushering Pro-Tips:

- **Keyboard Shortcut:** Press **'/'** on your keyboard at any time to instantly highlight the search box.
- **Audio Confirmation:** Keep laptop speakers on pleasant low volume so the check-in confirmation chime provides clear audible feedback as members pass.
- **Accidental Check-in?** Simply click the green checkmark badge again to un-mark and revert status to Absent.

7. Member Directory & Records Management

The system comes pre-loaded with **170 clean, unique church members** deduplicated from the parish PDF registry. The secretariat can view, search, update, and manage member profiles at any time.

Key Secretariat Operations:

- **Searching Members:** Navigate to '**Members Directory**' (/members/). Search across names, phone numbers, email addresses, or residential street addresses.
- **Adding Birthdays:** Click '**Edit**' on any member profile. Set their Birth Day and Birth Month. Once entered, they will automatically be included in the automated 7-Day Birthday Alert Engine.
- **Ministry Units / Departments:** Assign members to their active units: Choir, Ushering, Protocol, Prayer Warriors, Sunday School Teachers, Elders, etc.
- **Master Excel Export:** Click '**Export Members (.xlsx)**' to generate a full church membership roster for parish administration.

8. Automated Pastoral Care & Notification Engines

The application features two intelligent background engines designed to assist the pastoral care team in member retention and celebration.

1. Automated 7-Day Birthday Alert Engine:

The engine runs automatically every morning at 07:00 AM:

- Identifies all members whose birthday falls exactly **7 days away** (allowing the secretariat ample time to prepare birthday cards or announcements).
- Also lists all celebrants occurring in the upcoming 7 days.
- Formats a beautiful church-branded HTML email digest dispatched to the church official email (nhgccoshodi@gmail.com).
- The dashboard provides direct ****1-Click WhatsApp Greetings**** and ****Direct Phone Call**** buttons for immediate pastoral congratulations.

2. Consecutive Absentee Retention Engine (Missed 2–3 Sundays):

Tracks church attendance across recent Sundays to prevent members from falling away unnoticed:

- **Yellow Alert (Missed 2 Sundays):** Identifies members who missed 2 consecutive services. Requires a friendly phone call or WhatsApp message.
- **Red Alert (Missed 3+ Sundays):** Flags members at serious risk of drifting. The system pulls their **residential street address** from the database for physical pastoral home visitation.
- **Pastoral Care Log:** Ushers and pastors can log call outcomes (e.g. '*Spoke with member, was sick, will return next Sunday*').

3. Configuring Church Gmail SMTP (Email Notifications):

To enable actual outgoing email delivery from your church's Gmail account:

1. Open **System Settings** in the left navigation sidebar.
 2. Ensure Church Email is set to nhgccoshodi@gmail.com.
 3. Under **Outgoing Email (SMTP)**, set: Server: smtp.gmail.com, Port: 587, TLS: Enabled.
 4. Generate a 16-character **Google App Password**:
 - Go to your Google Account (myaccount.google.com) → Security → 2-Step Verification.
 - Scroll down to '**App passwords**', create a new one named 'NHGCC App'.
 - Paste that 16-character code into the SMTP Password field in the app settings.
 5. Click '**Save Settings**', then click '**Send Test Email**' to verify delivery.
- (Note: If SMTP is not configured, the app operates safely in Simulation Mode, logging all alerts on screen).

9. Database Safety, Routine Backups & Migration

Where Is Church Data Stored?

When installed via Install_NHGCC_App.bat, the live database is stored at:

%LOCALAPPDATA%\NHGCC_Church_Database\nhgcc_church.db

(To open this folder, press **Win + R**, type %LOCALAPPDATA%\NHGCC_Church_Database, and hit Enter).

Recommended Weekly Backup (Every Sunday After Service):

1. Close the NHGCC application.
2. Copy the file **nhgcc_church.db** from the application folder or LocalAppData.
3. Paste it onto a dedicated **Church Backup USB Flash Drive** or upload to the church Google Drive.
4. Name the backup with the date, for example: nhgcc_church_backup_2026_09_20.db.

Migrating Data to Another Computer in 60 Seconds:

Install the app on the new computer using Method A, copy your latest **nhgcc_church.db** to

%LOCALAPPDATA%\NHGCC_Church_Database\, and launch the app. All records and past attendances are instantly restored!

10. Frequently Asked Questions (FAQ) & Troubleshooting

Q1: What should I do if Windows Defender displays 'Windows protected your PC'?

This is normal for proprietary church software. Click **'More info'** in the blue dialog, then click **'Run anyway'**. The application will start immediately.

Q2: What if port 5000 is occupied by another program on the computer?

The system features an automatic port scanner! If port 5000 is occupied, it automatically shifts to port 5001, 5002, or any available port up to 5050 and opens your browser without any error.

Q3: What if the browser does not open automatically?

Open Google Chrome, Microsoft Edge, or Firefox manually, type **http://127.0.0.1:5000** into the address bar, and press Enter.

Q4: Can more than one person use the app at the church over Wi-Fi / Local Network?

Yes! The application can be accessed by other laptops or tablets on the same church Wi-Fi. Simply open the browser on the second laptop and navigate to **http://[HOST_IP_ADDRESS]:5000**.

Q5: Can I run this application completely offline without internet?

Yes. 100% of the church membership directory, Sunday entrance check-in desk, historical logs, and Excel export reports work completely offline without any internet connection.

Q6: How do I export attendance records to present to the Resident Pastor?

At the close of Sunday service, click **'Export Excel'** on the Entrance Check-in screen. A clean, formatted Excel spreadsheet containing all attendees, check-in timestamps, and departments will be generated instantly for printing or emailing.
